PROTEODIAG

PD Hybrid-Pro

A culture supplement for promoting **Hybridoma growth**

PD Hybrid-Pro is a conditioned medium derived from LPS-stimulated mouse macrophage. Each batch is produced under strictly controlled conditions and quality-tested to ensure that its hybridoma-enhancement activity meets our specifications. Only 1 – 4% PD Hybrid-Pro in culture medium is sufficient to effectively promote hybridoma growth.

Hybridoma-enhancement activity:
PD Hybrid-Pro vs another product

PD Hybrid-Pro is suitable for

- Enhancing hybridoma growth after fusion
- Promoting hybridoma growth at very low density (1 cell/well)
- Supporting hybridoma growth during monoclonal antibody production
